## Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

10 minutes

### Team gathering

Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.

### Set the goal

Think about the problem you'll be focusing on solving in the brainstorming session.

### Learn how to use the facilitation tools

Use the Facilitation Superpowers to run a happy and productive session.

Open article

## Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

5 minutes

**PROBLEM**  
How might we design an university admit eligibility predictor based on their marks?

### Key rules of brainstorming

To run an smooth and productive session

Stay in topic.

Encourage wild ideas.

Defer judgment.

Listen to others.

Go for volume.

If possible, be visual.

## Brainstorm

Write down any ideas that come to mind that address your problem statement.

10 minutes

### Pragadeeswaran S

Research about the admission process in different universities.  
Identify the criteria used for admission.  
Make sure that the predictor is reliable.  
Suggest suitable algorithms for the task.

### Naveenkumar R

Identify the criteria used for admission.  
Make sure that the predictor is reliable.  
Suggest suitable algorithms for the task.  
Use linear regression model when ever required.

### Chandran M

Identify the criteria used for admission.  
Make sure that the predictor is reliable.  
Suggest suitable algorithms for the task.  
Use linear regression model when ever required.

### Kishorekumar B

Identify the criteria used for admission.  
Make sure that the predictor is reliable.  
Suggest suitable algorithms for the task.  
Use linear regression model when ever required.

## Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

20 minutes

### Testing and Accuracy

Make sure that the accuracy of the predictor is reliable enough for the users.  
Put the model through rigorous tests.  
Verify the model's accuracy.

### Design algorithms

Use linear regression model when ever required.  
Design a suitable algorithm for the predictor.  
Verify the model's accuracy.

### Data Collection

Research about the admission process in different universities.  
Identify the criteria used for admission.  
Make sure that the predictor is reliable.  
Suggest suitable algorithms for the task.

### Miscellaneous

Identify the criteria used for admission.  
Make sure that the predictor is reliable.  
Suggest suitable algorithms for the task.  
Use linear regression model when ever required.

### User's End

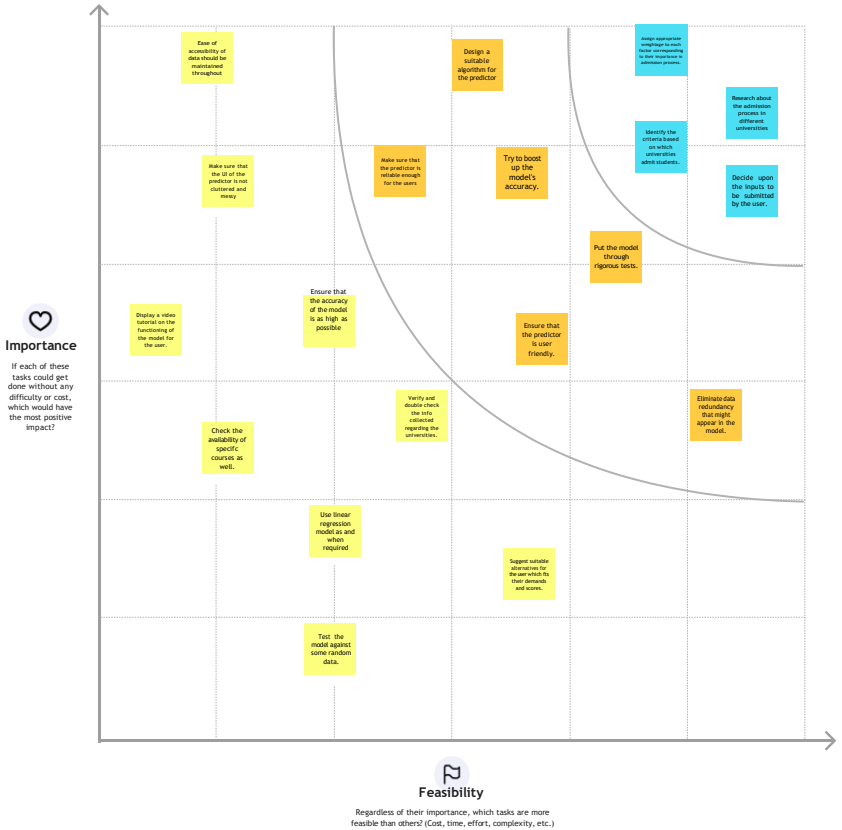

Make sure that the predictor is reliable enough for the users.  
Put the model through rigorous tests.  
Verify the model's accuracy.

## Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

20 minutes

## After you collaborate

You can export the mural as an image or pdf to share with members of your company who might find it helpful.

### Quick add-ons

#### Share the mural

Share a view link to the mural with stakeholders to keep them in the loop about the outcomes of the session.

#### Export the mural

Export a copy of the mural as a PNG or PDF to attach to emails, include in slides, or save in your drive.

### Keep moving forward

#### Strategy blueprint

Define the components of a new idea or strategy.

#### Customer experience Journey map

Understand customer needs, motivations, and obstacles for an experience.

#### Strengths, weaknesses, opportunities & threats

Identify strengths, weaknesses, opportunities, and threats (SWOT) to develop a plan.
